

Millani Khabir

UX Researcher & Product Designer with a Computer Science foundation

216-526-9087 | millanikhab@gmail.com | linkedin.com/in/millanik | github.com/codebymillani

EDUCATION

University of Central Florida — B.S. Computer Science

Orlando, FL | Expected May 2027

FEATURED CASE STUDY

ChoreBear — UX Researcher & Product Designer

Sep 2025 – Dec 2025

Mixed-Methods Research, Figma, Persona Development, Requirements Traceability

- Co-designed a mixed-methods study (28 participants: 22-response survey + 6 in-depth interviews) to uncover how college roommates navigate shared chores, finding that 63% communicated about chores monthly or less, and 67% reported ongoing frustration over unequal task distribution.
- Authored the interview guide and digital questionnaire, then personally conducted and synthesized interviews to develop two evidence-based personas (an avoidant communicator and a forgetful cohabitant) that anchored the team's design priorities.
- Translated research findings into 10 functional and 7 non-functional requirements, tracing each feature (chore assignment, deadline reminders, peer "nudge" notifications) directly back to a specific user pain point.
- Presented the final interactive prototype in a recorded walkthrough, articulating design rationale for each screen; project scored 9.5/10, with faculty specifically praising the clarity of the user research.

PROJECTS

Olist Customer Behavior Analysis — Quantitative UX Research

Jul 2026

Python, Pandas, RFM Segmentation

- Analyzed 100k+ user transactions across 9 relational datasets to uncover behavioral patterns and friction points, applying RFM segmentation to distinguish at-risk from loyal user cohorts.
- Built 15+ visualizations translating raw behavioral data into stakeholder-ready insight on retention and drop-off trends — the same synthesis instinct used to turn interview data into design priorities.

BudgetPet — Product Designer & Technical Lead

Jun 2026 – Jul 2026

Figma, Information Architecture, Node.js, MongoDB

- Translated a live front-end into a clickable multi-page Figma prototype to formalize user flows and align a 5-person team around a shared information architecture ahead of further development.
- Designed the underlying MongoDB data architecture, ensuring the product's technical structure could actually support its intended user experience — direct fluency in what's feasible to build, which grounds every design decision I make.

UCF Contacts — Information Architecture & Systems Design

May 2026 – Jun 2026

MySQL, Relational Schema Design

- Designed a normalized relational schema modeling how users, authentication, and contact records relate to one another, applying core information architecture principles to a real technical system.
- Coordinated a 5-person team, translating project requirements into a structured technical plan and keeping delivery on schedule.

EXPERIENCE

Chase Sanctuary & Wildlife Conservancy — Nonprofit & Project Management Intern

Sep 2026 – Present

Hybrid (Webster, FL)

- Build and maintain project trackers and dashboards across multiple departments, translating varied stakeholder needs into a shared, organized system.
- Support program evaluation by developing metrics and reporting used in donor and board communications, synthesizing raw data into clear, decision-ready narratives.

Shah's Halal Food — Service Lead & Trainer

Aug 2024 – Present

Orlando, FL

- Train and onboard new team members on systems and protocols, adapting explanations for varying technical comfort and language backgrounds — including multilingual staff — a direct parallel to designing for varied user mental models.
- Supervise front-of-house operations, resolving in-the-moment friction points to keep service consistent under pressure.

Chuck E. Cheese — T2 Trainer | Party Host | Cashier

Apr 2021 – Sep 2021, Sep 2023 – Apr 2024

Wesley Chapel/Orlando, FL

- Promoted to T2 Trainer; trained new employees and independently managed customer-facing events start to finish.

LEADERSHIP & INVOLVEMENT

Fashion Society at UCF — Web Design Chairman

Aug 2026 – Present

- Lead the Website Design Committee, owning the site's structure and content experience, and serve as liaison between web developers and other committees.

National Society of Black Engineers (NSBE) — Active Member

Aug 2024 – Present

- Participate in professional development conventions and community service initiatives as part of a network of Black engineers and technologists.

SKILLS

Research & Design: User Interviews, Survey Design, Persona Development, Affinity Mapping, User Flow Mapping, Requirements Traceability, Usability Testing, Figma (Wireframing & Prototyping), Information Architecture

Technical Foundation: Python (Pandas, NumPy), SQL, REST APIs, Git/GitHub

Tools: Figma, Google Forms, Jira, Monday.com, Excel, Trello, Tableau
